10 May 1956

MEMORANDUM FOR: Commander, 1007th Air Intelligence
Service Group

SUBJECT: Recommendation for Promotion

STAT

STAT

1. [] has been assigned to the medical section of this Project for over six months and has been under my direct supervision.

STAT

2. Although he was relatively untrained upon his assignment, he at once began vigorously to pursue a course of increasing his skill. During the early portion of his assignment, we had very few personnel in any section and [] made every effort to assist any group who needed help. He rapidly absorbed training in related skills and has become one of our most valuable team members.

3. His personal abilities have been so well demonstrated that he has been allowed to accept levels of responsibility one would expect only of the sergeant group. His trustworthiness in all of his duties has been exceptional.

4. Under the most strenuous circumstances, he has still performed his duties in an exceptional manner and has willingly accepted any additional duties cheerfully.

STAT

5. I recommend that [] be considered for promotion ahead of Airmen of comparable rank.
